Quarterly Report No. 1
By T.H. Vonder Haar and Collaborators**

Reporting period: May 8 to June 30, 2002

Cooperative Agreement #DAAD19-02-2-0005

The above-referenced multi-year Cooperative Agreement to continue our research under the DoD Center for Geosciences/Atmospheric Sciences was signed by the Army Research Laboratory Grants Officer, Ms. Patricia Fox, on May 8, 2002.

Due to the overlap created by the early execution of this Cooperative Agreement with the one under which we are currently operating (DAAD19-01-2-0018), the Center has no technical results to report during this federal quarter. Our research projects and tasks are in the process of being established in accord with the approved Annual Program Plan. In addition, the new subagreements with our scientific collaborators as outlined in the technical proposal and APP are nearly final. Consequently, no costs have been accrued against this new CA award in the period. We expect extensive activity to commence in the September-October timeframe.
